1 Introduction

2 Data

The datasets were retrieved, simulated, cleaned, analyzed, and tested using the R programming language (R Core Team 2023), `tidyverse` (Wickham et al. 2019), `haven` (Wickham, Miller,

*Data and code are available at: <https://github.com/moonsdust/toronto-collisions>.
The replication on the Social Science Reproduction Platform can be found here:

and Smith 2023), `knitr` (Xie 2014), `janitor` (Firke 2023), `dplyr` (Wickham et al. 2023), `ggplot2` (Wickham 2016), `sf` (Pebesma and Bivand 2023), `readr` (Wickham, Hester, and Bryan 2024), and `dataverse` (Kuriwaki, Beasley, and Leeper 2023).

3 Results

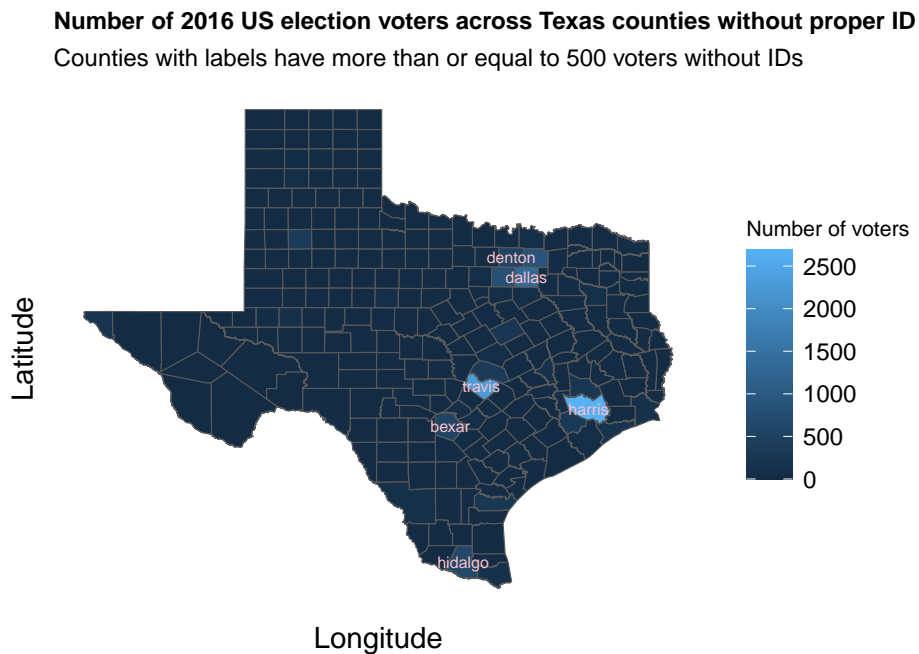

Figure 1: Number of voters across Texas counties during 2016 United States election without proper ID

4 Discussion

Appendix

.1 Acknowledgments

We would like to acknowledge Alexander (2023) for some of the R code used in this paper to produce the tables and graphs.

.2 Datasets Used

Due to the length of the datasets horizontally, presenting glimpses of the datasets was not possible in the paper. However, the cleaned datasets that was used can be found here: https://github.com/moonsdust/voting/tree/main/data/analysis__data.

.3 Tables from Results

Table 1: Number of United States election voters across Texas counties in 2016 without proper ID
